

expressing] which expresses the cellular oncogene or cellular  
proto-oncogene [product] to the human cellular oncogene, or a  
homologous oncogene or proto-oncogene to the human cellular  
oncogene.

Claim 16, line 1, delete "A", insert --The--.

Please cancel claim 17.

Cl. 18 (Twice Amended) [A] The method of claim 15,  
wherein the oncogene [or proto-oncogene product] of the  
recombinant pox virus is [of] derived from the human [origin]  
oncogene and is rendered inactive with respect to its oncogenic  
activity [the inactivity resulting from a] by a mutational  
alteration.

Cl. 19 (Thrice Amended) [A] The method of claim 15,  
wherein the oncogene of the recombinant pox virus [product, or an  
immunogenic portion thereof,] is encoded by the neu, ros, trk or  
kit gene.

Cl. 20 (Twice Amended) [A] The method of claim 15,  
wherein the oncogene [or proto-oncogene product] of the  
recombinant pox virus [or proto-oncogene product] is growth  
factor receptor molecule.
